CONTENTS

C. A. L. Oliveira, N. C. Silva, 225
C. L. Sabat, R. M. F. Lima

Reducing the Gap Between Business and Information Systems Through Complex Event Processing

R. Dobai, M. Baláz 251

Compressed Skewed-Load Delay Test Generation Based on Evolution and Deterministic Initialization of Populations

S. Iturriaga, 273
S. Nesmachnow,
B. Dorronsoro, P. Bouvry

Energy Efficient Scheduling in Heterogeneous Systems with a Parallel Multiobjective Local Search

J. Sun, H. Chen, 295
Ch. Chang, X. Li

Kernel Code Integrity Protection Based on a Virtualized Memory Architecture

M. Talmaciu, E. Nechita, 313
B. Iantovics

Recognition and Combinatorial Optimization Algorithms for Bipartite Chain Graphs

A. S. Nepomniashchaya 331

Efficient Parallel Implementation of the Ramalingam Decremental Algorithm for Updating the Shortest Paths Subgraph

P. Butka, J. Pócs 355

Generalization of One-Sided Concept Lattices

A. Ubul, E.-S. Atlam, 371
H. Kitagawa, M. Fuketa,
K. Morita, J. Aoe

An Efficient Method of Summarizing Documents Using Impression Measurements

D. Tatar, D. Inkpen, 393
G. Czibula

Text Segmentation Using Roget-Based Weighted Lexical Chains

T. Wichaiwong, 411
C. Jaruskulchai

A Double Scoring Method for XML Element Retrieval

Announcement 312, 330, 392
